Subject index

Ac impedance measurements
Design and evaluation of a four-electrode potentiostat/voltage clamp suitable for ac impedance measurements at the interface of immiscible electrolytes (VanderNoot et al.) 137
Alternating photocurrents
Stationary and alternating photocurrents on n-InP electrodes (Gröger et al.) 323
Antimony
Electrocatalytic properties of glassy metals. Combined Auger electron spectroscopy and electrochemical studies of the surface composition and electrocatalysis of CO oxidation at amorphous $Pt_{66}Sb_{34}$ alloy (Sun et al.) 205
Auger electron spectroscopy
Electrocatalytic properties of glassy metals. Combined Auger electron spectroscopy and electrochemical studies of the surface composition and electrocatalysis of CO oxidation at amorphous $Pt_{66}Sb_{34}$ alloy (Sun et al.) 205

Bismuth oxyhalide
Electrochemical formation of bismuth oxyhalide films in neutral halide solutions (Poznyak, Kulak) 227
Blank period
Chronopotentiometry with a potential-exponential current–time function at the DME with a preceding blank period. Application to the study of higher order electrochemical reactions (Molina et al.) 35
Blood
Effect of blood on K^+ ion sensitive membrane electrode performance and bulk resistance (Harrison) 193
Bulk resistance
Effect of blood on K^+ ion sensitive membrane electrode performance and bulk resistance (Harrison) 193

Carbon monoxide
Electrocatalytic properties of glassy metals. Combined Auger electron spectroscopy and electrochemical studies of the surface composition and electrocatalysis of CO oxidation at amorphous $Pt_{66}Sb_{34}$ alloy (Sun et al.) 205
Chronopotentiometry
Chronopotentiometry with a potential-exponential current–time function at the DME with a preceding blank period. Application to the study of higher order electrochemical reactions (Molina et al.) 35
Concentration profiles
Refractive index mapping of concentration profiles (Kragt et al.) 403
Conducting films
New conducting films by electrochemical oxidation of 1-naphthol. In-situ MIRFTIRS study of the electropolymerization mechanism (Pham et al.) 415
Copper
Fractal deposits of zinc and copper (Sagués et al.) 351
Current densities
Time-resolved imaging of current densities at inlaid disk electrodes (Pharr et al.) 119
Current–time function
Chronopotentiometry with a potential-exponential current–time function at the DME with a preceding blank period. Application to the study of higher order electrochemical reactions (Molina et al.) 35
Cytochrome *c*
Determination of the macroscopic formal potentials of cytochrome c_3 of *Desulfovibrio vulgaris*, Miyazaki F, through the combined use of ^1H NMR and an optically transparent thin-layer electrode cell (Fan et al.) 295
Direct electrochemistry of cytochrome *c* in the presence of heteropolytungstates (Chottard, Lexa) 387

Desulfovibrio vulgaris, Miyazaki F
Determination of the macroscopic formal potentials of cytochrome c_3 of *Desulfovibrio*

vulgaris, Miyazaki F, through the combined use of ^{1}H NMR and an optically transparent thin-layer electrode cell (Fan et al.) 295

Deuterium oxide
Energy balance of D_2O electrolysis with a palladium cathode. Part I. Theoretical relations (Balej, Divisek) 85
Energy balance of D_2O electrolysis with a palladium cathode. Part II. Experimental results (Divisek et al.) 99

Diffuse-layer theory
Notes on Gouy diffuse-layer theory (De Levie) 17

Electrochemical response
On the transient electrochemical response of rough electrodes. Part I. The current following a voltage step in the absence of faradaic processes (De Levie, Vogt) 25

Electrochromic thin film
Electrochromic properties of vacuum evaporated organic thin films. Part 2. Redox reaction of a vacuum-evaporated electrochromic thin film of 2,4,5,7-tetranitro-9-fluorenone (Yasuda, Seto) 269

Electron transfer
A theory of electron transfer at superconducting electrodes (Kuznetsov) 1

Electropolymerization mechanism
New conducting films by electrochemical oxidation of 1-naphthol. In-situ MIRFTIRS study of the electropolymerization mechanism (Pham et al.) 415

Ethanol
Dissociative adsorption of ethanol on Pt (*h*, *k*, *l*) basal surfaces (Cases et al.) 433

Four-electrode potentiostat/voltage clamp
Design and evaluation of a four-electrode potentiostat/voltage clamp suitable for ac impedance measurements at the interface of immiscible electrolytes (VanderNoot et al.) 137

Fractal deposits
Fractal deposits of zinc and copper (Sagués et al.) 351

Frozen solutions
A model for electrochemical reactions in frozen solutions (Gosser, Jr., Huang) 399

Gallium phosphide/electrolyte interface
An impedance study of electrochemically induced surface states at the p-GaP/electrolyte interface (Goossens et al.) 335

Glassy carbon electrodes
In situ characterization of electrochemically activated glassy carbon electrodes with scanning tunneling microscopy (Wang et al.) 379

Glassy metals
Electrocatalytic properties of glassy metals. Combined Auger electron spectroscopy and electrochemical studies of the surface composition and electrocatalysis of CO oxidation at amorphous $Pt_{66}Sb_{34}$ alloy (Sun et al.) 205

Gold plating
In situ observation of the gold plating process using a photoacoustic technique (Yoshihara et al.) 409

Gouy diffuse-layer theory
Notes on Gouy diffuse-layer theory (De Levie) 17

Halide
Electrochemical formation of bismuth oxyhalide films in neutral halide solutions (Poznyak, Kulak) 227

Heteropoly blue
Voltammetric determination of sulphate ion through heteropoly blue formation (Osakai et al.) 217

Heteropolytungstates
Direct electrochemistry of cytochrome *c* in the presence of heteropolytungstates (Chottard, Lexa) 387

Higher order electrochemical reactions
Chronopotentiometry with a potential-exponential current–time function at the DME with a preceding blank period. Application to the study of higher order electrochemical reactions (Molina et al.) 35

Hydroxytryptamine
Oxidation chemistry of 5-hydroxytryptamine. Part II. Mechanisms and products formed at millimolar concentrations in acidic aqueous solution (Wrona, Dryhurst) 249

Impedance measurements
Experimental artifacts associated with impedance measurements at liquid–liquid interfaces (Wiles et al.) 151

Indium phosphide electrodes
Stationary and alternating photocurrents on n-InP electrodes (Gröger et al.) 323

Inlaid disk electrodes
Time-resolved imaging of current densities at inlaid disk electrodes (Pharr et al.) 119

Interface of immiscible electrolytes
Design and evaluation of a four-electrode

potentiostat/voltage clamp suitable for ac impedance measurements at the interface of immiscible electrolytes (VanderNoot et al.) 137

Lipid layers
Substrate-induced structural changes in electrode-adsorbed lipid layers. A self-consistent field theory (Leermakers, Nelson) 53
Substrate-induced structural changes in electrode-adsorbed lipid layers. Experimental evidence from the behaviour of phospholipid layers on the mercury–water interface (Nelson, Leermakers) 73
Liquid–liquid interfaces
Experimental artifacts associated with impedance measurements at liquid–liquid interfaces (Wiles et al.) 151

Mercury electrode
Chronopotentiometry with a potential-exponential current–time function at the DME with a preceding blank period. Application to the study of higher order electrochemical reactions (Molina et al.) 35
Study of the electrochemical reduction of nicotinic acid at a mercury electrode (Rodríguez-Amaro et al.) 307
Mercury–water interface
Substrate-induced structural changes in electrode-adsorbed lipid layers. Experimental evidence from the behaviour of phospholipid layers on the mercury–water interface (Nelson, Leermakers) 73
Metal cluster
A simple model for the growth of two-dimensional metal clusters (Marner, Schmickler) 393

Naphthol
New conducting films by electrochemical oxidation of 1-Naphthol. In-situ MIRFTIRS study of the electropolymerization mechanism (Pham et al.) 415
Nicotinic acid
Study of the electrochemical reduction of nicotinic acid at a mercury electrode (Rodríguez-Amaro et al.) 307
Nitroethane
Electrochemical study of the water|nitroethane interface (Paleska et al.) 129

Optically transparent thin-layer electrode cell
Determination of the macroscopic formal potentials of cytochrome c_3 of *Desulfovibrio vulgaris*, Miyazaki F, through the combined use of ^{1}H NMR and an optically transparent thin-layer electrode cell (Fan et al.) 295
Organic thin films
Electrochromic properties of vacuum evaporated organic thin films. Part 2. Redox reaction of a vacuum-evaporated electrochromic thin film of 2,4,5,7-tetranitro-9-fluorenone (Yasuda, Seto) 269

Palladium cathode
Energy balance of D_2O electrolysis with a palladium cathode. Part I. Theoretical relations (Balej, Divisek) 85
Energy balance of D_2O electrolysis with a palladium cathode. Part II. Experimental results (Divisek et al.) 99
Palladium oxide pH sensors
An electrochemical preparation of palladium oxide pH sensors (Bloor, Malcolme-Lawes) 161
Phospholipid layers
Substrate-induced structural changes in electrode-adsorbed lipid layers. Experimental evidence from the behaviour of phospholipid layers on the mercury–water interface (Nelson, Leermakers) 73
Photoacoustic technique
In situ observation of the gold plating process using a photoacoustic technique (Yoshihara et al.) 409
pH sensors
An electrochemical preparation of palladium oxide pH sensors (Bloor, Malcolme-Lawes) 161
Platinum + antimony alloy
Electrocatalytic properties of glassy metals. Combined Auger electron spectroscopy and electrochemical studies of the surface composition and electrocatalysis of CO oxidation at amorphous $Pt_{66}Sb_{34}$ alloy (Sun et al.) 205
Platinum basal surfaces
Dissociative adsorption of ethanol on Pt (h, k, l) basal surfaces (Cases et al.) 433
Platinum/propylene carbonate interface
Radiotracer and voltammetric study of water at the platinum/propylene carbonate interface (Zelenay et al.) 361
Poly-pseudo-crown ethers
Electrosynthesis of conducting poly-pseudo-crown ethers from substituted thiophenes (Roncali et al.) 373
Poly(pyrrole–pyromellitimide) modified electrodes

Poly(pyrrole–pyromellitimide) modified electrodes (Grimshaw, Perera) 279
Poly(thiophene–benzoquinone) films
Electrochemical behaviour of poly(thiophene–benzoquinone) films (Grimshaw, Perera) 287
Potassium ion sensitive electrode
Effect of blood on K^+ ion sensitive membrane electrode performance and bulk resistance (Harrison) 193
K^+ sensitive bilayer supporting electrodes (Miller et al.) 175
Propylene carbonate
Radiotracer and voltammetric study of water at the platinum/propylene carbonate interface (Zelenay et al.) 361

Refractive index mapping
Refractive index mapping of concentration profiles (Kragt et al.) 403
Rhodium electrodes
Comparison of voltammetry of vacuum-prepared Rh (100) and Rh (111) electrodes (Wasberg et al.) 425
Rough electrodes
On the transient electrochemical response of rough electrodes. Part I. The current following a voltage step in the absence of faradaic processes (De Levie, Vogt) 25

Scanning tunneling microscopy
In situ characterization of electrochemically activated glassy carbon electrodes with scanning tunneling microscopy (Wang et al.) 379
Self-consistent field theory
Substrate-induced structural changes in electrode-adsorbed lipid layers. A self-consistent field theory (Leermakers, Nelson) 53
Stationary photocurrents
Stationary and alternating photocurrents on n-InP electrodes (Gröger et al.) 323
Structural changes
Substrate-induced structural changes in electrode-adsorbed lipid layers. A self-consistent field theory (Leermakers, Nelson) 53
Substrate-induced structural changes in electrode-adsorbed lipid layers. Experimental evidence from the behaviour of phospholipid layers on the mercury–water interface (Nelson, Leermakers) 73
Sulphate ion
Voltammetric determination of sulphate ion through heteropoly blue formation (Osakai et al.) 217
Superconducting electrodes
A theory of electron transfer at superconducting electrodes (Kuznetsov) 1
Surface states
An impedance study of electrochemically induced surface states at the p-GaP/electrolyte interface (Goossens et al.) 335

Tetranitrofluorenone
Electrochromic properties of vacuum evaporated organic thin films. Part 2. Redox reaction of a vacuum-evaporated electrochromic thin film of 2,4,5,7-tetranitro-9-fluorenone (Yasuda, Seto) 269
Thiophenes
Electrosynthesis of conducting poly-pseudo-crown ethers from substituted thiophenes (Roncali et al.) 373
Time-resolved imaging
Time-resolved imaging of current densities at inlaid disk electrodes (Pharr et al.) 119
Transient electrochemical response
On the transient electrochemical response of rough electrodes. Part I. The current following a voltage step in the absence of faradaic processes (De Levie, Vogt) 25
Two-dimensional metal clusters
A simple model for the growth of two-dimensional metal clusters (Marner, Schmickler) 393

Vacuum evaporated organic thin films
Electrochromic properties of vacuum evaporated organic thin films. Part 2. Redox reaction of a vacuum-evaporated electrochromic thin film of 2,4,5,7-tetranitro-9-fluorenone (Yasuda, Seto) 269
Voltage clamp
Design and evaluation of a four-electrode potentiostat/voltage clamp suitable for ac impedance measurements at the interface of immiscible electrolytes (VanderNoot et al.) 137
Voltage step
On the transient electrochemical response of rough electrodes. Part I. The current following a voltage step in the absence of faradaic processes (De Levie, Vogt) 25

Water|nitroethane interface
Electrochemical study of the water|nitroethane interface (Paleska et al.) 129

Zinc
Fractal deposits of zinc and copper (Sagués et al.) 351
